# CONSTRUCTION NOTICE

## Pedestrian and Bicycle Safety Improvements

The City of Ojai has awarded a contract to Granite Construction to construct Pedestrian and Bike Safety Improvements on Maricopa Highway (SR 33). This project includes the reconstruction of sidewalks, bicycle lanes, and driveways. The project will **begin** at Vallerio Avenue and move West, **ending** at the El Roblar Drive and Cuyama Road. Construction will primarily focus on the Nordhoff High School side (South) of the road, along with the intersection median. For your safety, please observe the "No Parking" signs and all construction signage posted on streets for specific dates, times and/or limits of construction area.

**TRAFFIC IMPACT:** The following conditions will be in effect during construction:

Bike lanes and sidewalks on the South side (Nordhoff High School side) of Maricopa Highway will be completely closed to vehicles, bicyclists, and pedestrians. For the limits of the construction project work zone, 1 through traffic lane will always be for use by the public at both directions of travel. During the duration of the project the posted speed limit shall be 25 MPH. Driveways shall remain open until work is actively being done in front of the driveway. Deviations of traffic control patterns may occur during construction. During the construction of the pedestrian path improvements, pedestrian detour signs will be posted for safe and adequate pedestrian zones.

All other traffic signs are still in enforcement and should be observed (e.g. street sweeping, fire lane access). Please relocate any vehicles located in 'No Parking' zones, throughout the duration of dates listed, to the nearest available cross streets for parking.

The entrance and exits at the Vons the shopping center and doctors offices will remain open throughout the duration of the construction.

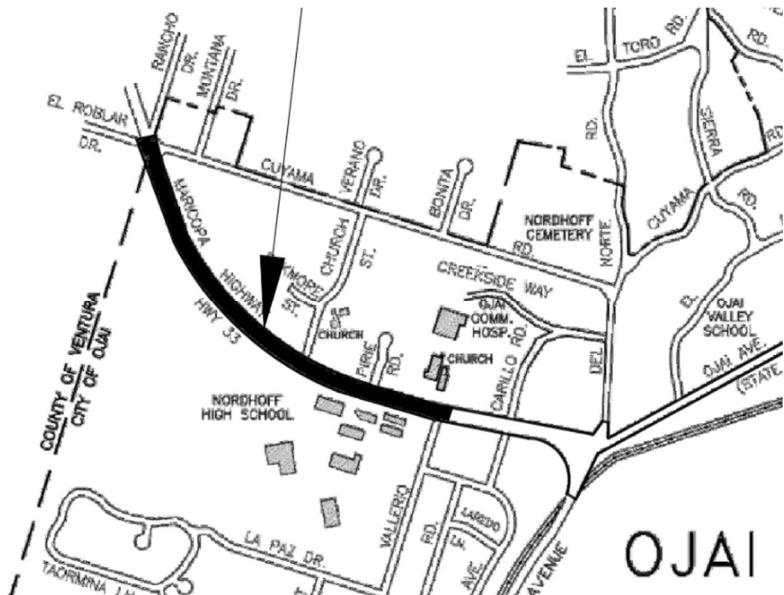

### CONSTRUCTION DETAILS:

**START:** September 18<sup>th</sup>, 2024

**END:** Spring, 2025

**HOURS OF OPERATION:** 7:00am to 5:00pm  
Dates and times are subject to change.

**TYPE OF WORK:** Demolition and reconstruction of street, bike lane, sidewalk, and driveways. Related striping to be installed at the end of construction.
